Mark, if you call him, get me in the loop.

Todd, the same with you, if you have a call with him, keep me in the loop with a three way telephone call.

Bart,

My understanding is that Mark is going to contact (b) (6) to talk to him about the sample results. John just wanted to make sure that you are on the call with (b) (6) when Mark calls him to discuss the sample results.

Thanks, Hebert

The letter was sent and that week the OSC personally contacted (b) (6) and explained that once the report is final a copy will be provided to him.

Nothing more or new about that.

Later in a call with ODEQ with Susan Webster present, ODEQ informed that they will also be

9866127

contacting the residents with results of the December ground water sampling results. The (b) (6) status was discussed. ODEQ mentioned that in a future they may request further assistance by requesting sampling to other properties. To what Susan indicated she did not have ISE and will need to further check with attorneys in that case. As far as (b) (6), depending on final report, was mentioned if further expanding the fence area will be appropriate. I will cc: de OSC asking for more info. This was sort of a gray area, since the results of the samples at the surface were less than 200 ppm of lead.

Mark, is there any decision to further expand the fenced area? Any news about ODEQ blood lead levels sampling?

Bart,

Sorry you are not feeling well. Could you take a few minutes, if possible, and just send a note to John letting him know the status of contacting (b) (6) concerning the Wilcox site.

Thanks, Hebert

I left a voice mail at John's voice mail.

I got a cold and will stay home today taking sick leave and will submit to have Flexiplace for Tuesday and Wednesday.

I will continue to work reviewing the Devil's Swamp RI/FS.

If I feel better will be back in the office Thursday, or will ask for more Flexiplace until this cold is gone. Don't want to be in the office spreading the cold.

Send me an email if you need something from me. Specially LAAP that is a hot subject.
